

LAVA™ NW

Platemaking Equipment

The Right Choice for Quick and Easy Thermal Plate Processing.

The MacDermid LAVA NW Plate Processing System represents the latest advancement in thermal platemaking technology from MacDermid. Thermal platemaking improves productivity and workflow, generating press-ready plates in less than an hour. Additionally, LAVA Thermal Plate Processing eliminates solvents and VOCs from the platemaking process, resulting in a more environmentally friendly process.

The LAVA NW is specifically designed for narrow web applications with a sleek and efficient design and small overall footprint.

The advanced design of the LAVA system incorporates an internal filter system, vapor management system, durable sub-frame, an automated lift lid, ultra-modern motors, and LED illumination.

For quick and easy thermal plate processing, count on the company that innovates with you in mind - MacDermid.
