

Accent

Coating Plates

Accent Your Printing with MacDermid Accent Coating Plates

Macdermid's Accent is a spot varnish approach to give your printing an advantage over the competition. You can image and process Accent coating plates yourself, giving you more control of your workflow and printing schedule. This coating plate can be imaged on a UV CTP and processed in water. And it's compatible with most UV and aqueous varnishes.

When you're looking for a competitive advantage in your printing process, count on the company that innovates with you in mind - **MacDermid**

KEY FEATURES & BENEFITS

- Plates made in your facility gives you better control of your workflow
- Imaged using UV CTP
- Processed using high-pressure water spray, followed by a conventional plate dryer with UV post cure
- Ability to obtain finer detail than with strippable blankets
- Lower cost than plates made at flexo plate tradeshops
- Compatible with most UV and aqueous based varnishes
- Aluminum substrate for excellent register control

Coating Plates

PRODUCT CONFIGURATION

- Available for all standard 8-up sizes
- Standard thicknesses are 0.76 mm and 1.14 mm (other thicknesses may be available on request)
- Aluminum substrate - 0.30 mm

REPRODUCTION CAPABILITIES

- Minimum isolated dot 400 microns
- Minimum fine line 200 microns
- Number of impressions > 200,000

PLATEMAKING

- Plates are imaged using a CTP equipped with UV lasers
- Plates are developed using MacDermid's VPW-1320 Automatic Washout Unit or Manual Washout Booth, then dried in a high temperature plate dryer and UV post cured

INK/SOLVENT COMPATIBILITY

Accent plates are compatible with most aqueous and UV varnishes

APPLICATIONS

Plates are used for spot coating where fine detail is needed. Typical applications include packaging and commercial printing.
